

REMARKS

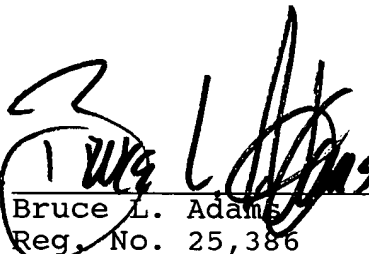

In order to place this application in better condition for a complete action on the merits, the specification has been suitably revised to correct informalities and to place it in better conformance with U.S. practice. A new abstract has been submitted to replace the original abstract. Claims 1-8 have been canceled without prejudice or admission and replaced by new claims 9-28. The newly added claims contain revised versions of the original claims which have been rewritten in formal respects to improve the wording and bring them into better conformance with U.S. practice, and new claims added to provide a fuller and more comprehensive scope of coverage. Adequate support for the subject matter recited in claims 9-28 may be found in the specification as originally filed.

Early and favorable action on the merits are respectfully requested.

Respectfully submitted,
